MOVING FORWARD IN GRACE

Building Our Digital Future

We've developed a robust website that embodies our vision, mission, goals, and future aspirations. As our community expands, this digital platform serves as our virtual hub. Mobile and Beyond

We're excited to announce that our phone app, currently available through Wix Spaces, is the first step towards a broader mobile presence. Our next phase involves publishing the app on Apple and Google platforms. Beyond that, we envision a future with VR, AR, and Mixed Reality experiences, including AI and Hologram Simulations.

Leveraging Technology for Learning

We've partnered with over a hundred app, game, and curriculum providers to enhance our educational offerings. This collaboration allows us to draw from diverse resources and provide comprehensive learning opportunities.

Community and Challenges

We're incredibly grateful for the overwhelming support we've received. While we've encountered challenges along the way, the strength of our community and the unwavering support of our allies have propelled us forward.

We're actively expanding our network of allies and will soon release a comprehensive guide highlighting these valuable partnerships

FOSTERING CREATIVITY AND GRACE FOR TRANSFORMATION

Maslow's Hierarchy of Needs and Organizational Performance

Our theoretical framework incorporates Maslow's Hierarchy of Needs to underscore the importance of fulfilling basic human needs as a foundation for leadership and transformative productivity. This model has been widely recognized and applied across various sectors, including government, professional sports, medicine, law, and top-level management.

We've conducted extensive research and peer review, and our findings, approved by the Board of Education, demonstrate a strong correlation between providing for basic needs and achieving higher levels of performance. By addressing the seven stages of productivity and performance—basic needs, self-care, security and safety, approval, achievement, recognition, rewards, and self-actualization—organizations can create environments that foster growth, innovation, and employee, citizen, and civility satisfaction of all communities. Every community will have the opportunity to be acclimated into a holistic approach to a standard of excellence and quality of life for all.

7 Promises of God

1. I will be with you.
2. I will protect you.
3. I will be your strength.
4. I will answer you.
5. I will provide for you.
6. I will give you peace.
7. I will always love you.

COMMUNITY INNOVATION

Community Empowerment and Strategic Partnerships

We're proud to have sponsored three incarcerated individuals to support their storytelling and publishing endeavors. We're actively working with the Drop-In Center in Corvallis, Oregon, to acquire the Rodeway Inn, China Delight, and potentially the Coast, Newport, and Powell Butte Destination Resort. These acquisitions, pending finalization with an approved lender and philanthropist, will significantly expand our community impact.

Our partnership with Kingdom Builders will further enhance our capabilities, leveraging their \$4M real estate portfolio to create new opportunities.

We're excited to share our journey through a documentary film that will be released on platforms like Netflix and Tubi.
